ISMS Policy

We are committed to

- Ensure confidentiality, integrity and availability by adequately protecting the critical information assets and systems against unauthorised access, modification or alteration

- Establish and implement security policies and processes while considering the protection of critical information assets and systems from internal and external threats

- Comply with legal, regulatory and contractual security obligations as may be applicable

- Ensure security awareness and competency amongst all the associates to enable them to meet their security obligations

- Provide a framework to manage and handle security breach, violations and business disruptions

- Ensure continuity of critical operations in line with business and contractual requirements

- Ensure continual improvement of the security posture to consistently meet ISMS and its security objectives
